

solar performance part 5

solar performance 2003-06 in nine parts
decided to utilize the raw source files for
these books -- squeezing as much of myself
behind the color-averaged vertical panels
animated-incidentals: pdf page views are
compelling: shifting shadows, bobbing
boats, fleeting clouds... I continued this
solar performance into the GIP (Global
Islands Project) up until Bangladesh when
it became culturally impossible to expose
this much flesh: I got scathing looks just
when wearing shorts above the knee...
would prefer to replace the unavoidable
low-res Amazon version with better quality
