

## Superkul - Rain Gravity Heat Cold

Toronto-based practice superkul was founded in 2002. Its principals, Andre DELia and Meg Graham, have a broad range of professional experience in Canada and abroad, and this monograph reflects their diverse portfolio of project types, ranging from single-family residences to large-scale commercial and public works. Wood features prominently in the practices designs, which are inspired by the elements and demonstrate a commitment to pragmatism and advanced building technologies. Printed on soft, folded pages filled with beautiful photographs, this tactile and stimulating volume matches superkuls aesthetic of connecting with the natural context. With a text by Kiel Moe.
