

# Gastric Cancer

The editors have produced a concise and up-to-date account of all aspects of gastric cancer, which is still one of the five major causes of cancer death in most countries of the world today. The book ranges from epidemiology, aetiology, and biology, to surgical and non-surgical treatments and primary and secondary prevention. It summarizes the latest progress in the various fields, as well as providing practical guidance on diagnosis and management, and is written by acknowledged experts in the subject both in the West and Japan.
