

Monteverdi

Paolo Fabbri's *Monteverdi*, first published in Italian, is the leading study of the greatest composer of late Renaissance and early Baroque Italy, rightly called the father of modern music. A large number of contemporary documents, including some 130 of his own letters, offer rich insights into the composer and his times, also illuminating the many and varied contexts for music-making in the most important musical centers in Italy. This newly revised translation brings an indispensable text to a much broader readership.
