

Interaction in Human Development (Crosscurrents in Contemporary Psychology Series)

Interaction in Human Development unites theoretical essays and empirical accounts bearing directly on the nature of interactions as a principal factor and organizing feature in human mental and social development. The papers discuss all areas of interaction including genetic, environmental, life-span, interpersonal, and cultural. Ideal as a text for students and as a reference for professionals in personality, developmental, educational, and environmental psychology, psychotherapy, behavioral medicine, and language.
