

Transformations

Following almost 20 years in practice, comes Penoyre & Prasad's first monograph, *Transformations*. One of the UK's leading architectural practices, Penoyre & Prasad are renowned for buildings that are centred on people's experience, are green and visually striking. *Transformations* provides a comprehensive overview of the practice, their approach and their work, in their own words. With an introduction by Tom Muirhead, the book comprises eight essays written by Sunand Prasad: Purpose; Care; Art; Construction; Time; Limits; Learning and Context. Through these, Prasad details the positions and influences that have informed the practice's approach, reveals their way of working and their exchange with current and historic architectural culture.
