

Collaboration Through Craft

Offering a challenging new argument for the collaborative power of craft, this ground-breaking volume analyses the philosophies, politics and practicalities of collaborative craft work. The book is accessibly organised into four sections covering the cooperation and compromises required by the collaborative process; the potential of recent technological advances for the field of craft; the implications of cross-disciplinary and cross-cultural collaborations for authority and ownership; and the impact of crafted collaborations on the institutions where we work, learn and teach. With cutting-edge essays by established makers and artists such as Allison Smith (US) and Brass Art (UK), curator Lesley Millar, textile designer Trish Belford and distinguished thinker Glenn Adamson, *Collaborating Through Craft* will be essential reading for students, artists, makers, curators and scholars across a number of fields.
