

The Behavioral Sciences and Health Care

This work is suitable for medical and other students and trainees learning the behavioral sciences. It is a clearly structured, compact text on the behavioral sciences for medical and other students and trainees, including practical features such as annotated review questions and a practice exam. The brand new edition of this compact text presents succinct information about the wide variety of behavioral, social, and psychological sciences that comprise the behavioral sciences relevant to health and wellness. Based around but expanding on the Integrated Sciences Model, and integrating the Institute of Medicine's key themes for medical training, the new edition is organized in sections covering: Biological Mediators of Behavior; Individual-Environment Interaction; Development Through the Life Cycle; Social and Cultural Determinants; Societal and Behavioral Health Challenges; The Health Care System, Policy, and Economics; Physician-Patient Interaction; and Psychopathology. New chapters deal with Stress, Adaptation, and Illness; Geriatric Health and Successful Aging; Palliative Care; Health Care Issues Facing Gay, Lesbian, Bisexual, and Transgender Individuals; Competency in Clinical Education; Health Literacy; and Changing Risk Behaviors. Clear appendices review principles of epidemiology and biostatistics. Each chapter begins with guidance questions and ends with current recommended readings and review questions. A complete 300+ question-and-answer USMLE-type review section not only allows readers to check how well they have learned the material, but also highlights important points and adds additional specific information to supplement the text. The authors of this text are experienced teachers and researchers drawn primarily from the membership of the Association for the
